Art 2 - Watercolor Class

(Advanced Class for both kids and adults)

1. Course Description

We take students of ages over 9 (including adults) who have some training in watercolor painting. In the class, the students will enhance the painting skills and work on projects. The goal of this class is to build up the interest and passion in painting and make students' own artwork.

We would have students' artwork display at the end of the semester.

2. Classroom Policies

No food/drink.

Parents are responsible for cleaning up the area where your kid(s) worked after each class.

3. Instructor

Longze Zhang, PhD, Image Scientist and Software Engineer, is well known as a paper cutting and watercolor artist. Below is some of the instructor's artwork.
